The new standard of care in wound healing.

MIRRAGEN® Advanced Wound Matrix is a next-generation intervention for wound healing. Using borate-based bioactive glass fiber technology, MIRRAGEN® dramatically reduces healing time for patients, while minimizing treatment costs and improving outcomes for providers.

Indications

- Diabetic Ulcers
- Pressure Ulcers
- Venous Ulcers
- Burns – 1st and 2nd Degree
- Traumatic Wounds
- Surgical Incisions
- Donor Graft Sites
- Recipient Graft Sites

Accelerate Healing

Bioactive glass aids the rapid formation of granulation tissue.

Decrease Wound Area

MIRRAGEN® reduces wound area by greater than 70% at 3 weeks during a randomized controlled trial comparing MIRRAGEN® to standard of care.*

Increase Value

With MIRRAGEN®, providers can reduce cost to closure by 75-95% as compared to other advanced interventions, resulting in an average spend of $670* per healed wound.

*Data on file.
Results

Mid study findings (N=40) from a 100 patient randomized controlled trial comparing MIRRAGEN® to standard of care (SOC) treatment in Wagner 1 diabetic foot ulcers (DFUs)*

- **80% wound area reduction at 12 weeks using MIRRAGEN®**
- **70% healed at 12 weeks using MIRRAGEN®**

**Improve Efficiencies**

With minimal training and a long shelf life, MIRRAGEN® is the easy and economical choice for providers. Patients spend an average one 20-minute visit per week, and receive an average of 6 treatments per closure.*

**Safe to Use**

FDA-cleared MIRRAGEN® borate-based bioactive glass fiber technology is biocompatible with living tissue, bioresorbable and safe for all wound types.
# Packaging Configurations

## Single Barrier

Supplied sterile in a sealed pouch with a recyclable backer card.
